Parent vs. Instrument

Same stroke language. Different character.

CANDLEFISH

CANDLEFISH

Faces left · Crosshair scope · Sharp V-tail · Smooth dorsal

PERCH

Faces right · No scope · Soft-arc tail · Spiny dorsal

SHARED DNA

- Thick uniform stroke weight throughout
- Pure line art — no fills except the eye dot
- Single-color monochrome on any background
- Crisp, geometric curves — minimal detail
- Round line caps and joins
- Filled-circle eye
- Single pectoral fin, single gill arc

DIFFERENTIATION

- CF faces left (retrospective) ■ Perch faces right (forward-watching)
- CF crosshair scope (targeting) ■ Perch no scope (calm observation)
- CF sharp V-forked tail ■ Perch soft-arc tail
- CF single smooth dorsal ■ Perch 4 spiny dorsal + angular membrane
- CF elongated torpedo body ■ Perch rounder, stockier body
- CF #04DAF6 cyan ■ Perch #4A9BA8 warm steel teal

PRODUCT TAXONOMY

- Candlefish builds instruments. Not agents, not bots, not copilots.
- An instrument is purpose-built, precise, and designed for a specific job.
- Perch is the first. The naming convention scales: each instrument gets its own mark, its own accent, and its own character within the family.

Black/white foundation from Candlefish. Instrument accent #4A9BA8 is a warm sibling of the parent cyan.

WEEKLY OWNER BRIEFING

Revenue was up 12% but margins compressed. The Hendricks job came in at 18% gross — well below your 32% average. Material costs were flat, so this is a labor problem. Worth a conversation with your PM before the next bid goes out.

ANOMALY ALERT

Two identical charges from Sherwin-Williams on 3/14: \$2,847 each. Could be a double-run. Check with Sarah before the statement closes Thursday.

CASH FLOW READ

You have 41 days of operating cash at current burn. AR aging is clean — nothing past 45. The pinch comes in June when the equipment lease resets and Q2 taxes hit the same week. You'll want \$85K liquid by May 28.

USAGE RULES

1. Accent period is mandatory: Perch. not Perch
2. Attribution: “instrument by Wake · built by Candlefish”
3. Perch faces right. Candlefish faces left. Always.
4. Match Candlefish's stroke weight — thick, uniform, crisp
5. Filled-circle eye. No outline ring around the eye.
6. Never use the crosshair scope — Candlefish's motif only.
7. The 4 dorsal spines + angular membrane = species ID. Keep them.
8. Minimum clear space: 1× the eye diameter around the mark.

Instrument Architecture

Candlefish builds instruments. Perch is the first.

Candlefish

COMPANY · Design house

Wake

PLATFORM · Infrastructure layer

Perch.

INSTRUMENT · Financial analysis

Future instruments inherit the same system: black/white foundation, line-art fish mark, product accent, and “instrument by Wake” attribution. Each instrument gets its own fish species, its own accent color, its own name. The crosshair scope belongs to Candlefish alone.
